W. A. SHEAFFER PEN COMPANY, Fort Madison, Iowa, U.S.A. New York - Chicago - San Francisco

FOREWORD

The first SHEAFFER pen was made in the rear room of a modest size jewelry store in Fort Madison, Iowa, by Mr. W. A. Sheaffer. That was in 1913. The first pens made and the millions that were to follow them were manufactured according to the quality standard for which fine items of jewelry are famous. The business grew. Soon it was necessary to rent the second floor of a building; later a complete building was taken over. Today, SHEAFFER pens are made in a large, up-to-date factory on the site of the historic fort on the banks of the Mississippi named for President Madison.

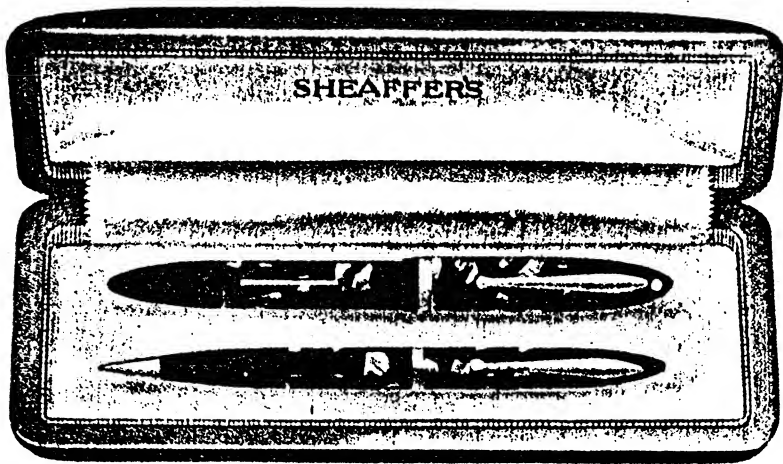

The writing instruments shown in this abbreviated catalog are without question the finest it is possible to produce. They embody improvements in design and manufacture which are exclusively SHEAFFER'S. Only the finest materials and the most expert craftsmanship are employed. Each is a superlative value for the money.

A merchant can use this catalog to select his stock with the assurance that the goods will be as represented and that the company will stand back of them. The success of the W. A. Sheaffer Pen Company has been made possible through the support of the trade, their appreciation of our policy to keep full profit in the merchandise, the quality of the merchandise and the huge amount of effective advertising placed behind the line.

A conscious effort has been made in this catalog to abbreviate the information while keeping it thoroughly understandable. You will find the items of a similar classification in the pen line, the pencil line, the desk set line, and the ensemble line grouped together. Most pens, pencils and ensembles are produced in 4 distinctive Sheaffer colors—Ebonized Pearl, Grey Pearl, Marine Green and Black—but for the sake of brevity, one color will be illustrated in a model and data for the selection of other colors in the same model appended in tabulated form.

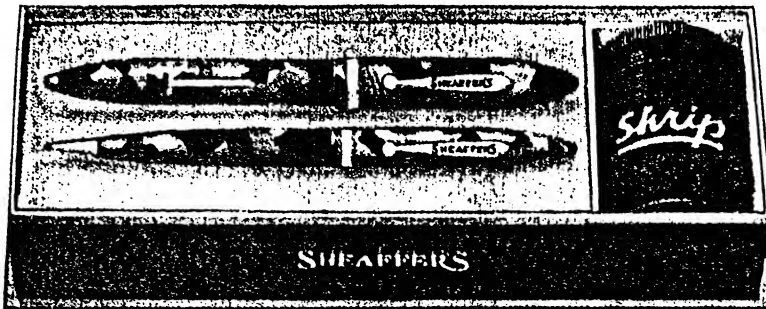

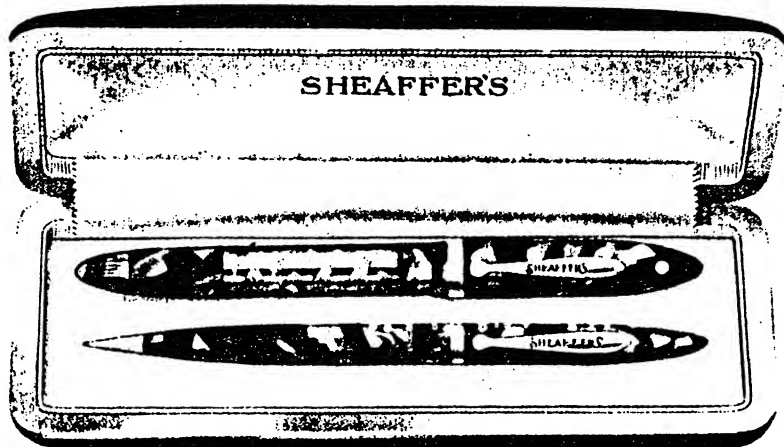

A glance through the following pages will show you how simple, yet complete, the SHEAFFER line is. There is a pen or a set for every purse and taste; a point for every style of handwriting. Sheaffer gold pen experts are prepared to duplicate the writing qualities of any favored steel point, should the exact point for the customer not be found in the standard line. Inquiries on our merchandise to meet particular needs are invited.

Reference to this catalog will assist you in keeping your stock rounded out through the remaining busy months of the year, and in advising customers concerning a model on which you are out of stock. Therefore, we suggest you file it for future reference after checking it now for the models you wish to add to your assortment immediately. We've enclosed an order blank for your convenience.

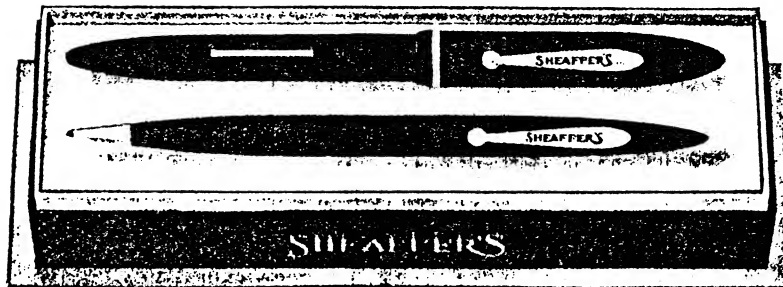

Thrillingly beautiful ensembles are supplied in this rich DeLuxe presentation case with gold and satin trim. Sets are priced from \$8.50 up. Illustrated is the "First Lady" set in Ebonized Pearl. For details of sets available in this box, see Page 10.

Certain colors look best presented in the DeLuxe presentation case with silver trim. Illustrated is a Grey Pearl Lifetime set with Chromium clips and bands. For further details, see Page 10.

This 3-piece set has an extra value for the customer. When the customer buys the pen in addition to the pen selected, he saves \$1.00 on the pen and, in addition, gets a SAFETY SKRIP bottle FREE, making his saving \$1.75. Thus this set ties up with a very effective merchandising plan designed to raise the nult of sale. For further details on 3-piece sets, see Page 11.

Two-piece ensembles in the lower-priced pens and pencils are offered in this attractive black and gold box. Set illustrated is a popular \$5.00 seller. For further information on 2-piece sets, see Page 12.

THE NEW "First Lady" LINE

Here is a line that has been particularly designed with plenty of eye appeal especially for ladies' use. Note the slender shape, the gracefully tapered design, the perfect proportion which each part of the pen bears to the whole. This makes it Milady's first choice. For details on sets, see Page 10. Identical values in lever-fill or visible.

SHEAFFER'S PROPEL-REPEL-EXPEL PENCILS TO MATCH ALL SHEAFFER PENS

There is a pencil to match every SHEAFFER pen. Prices range from \$1.00 to \$5.00. The SHEAFFER pencil was first famous for its propel-repel-expel mechanism, built to last a lifetime and fitted into the pencil without any soldered joints. Sheaffer is still famous for this mechanism but in addition, the Streamlined pencil first incorporated the "break" in the middle so that the upper half of the pencil actuates the mechanism instead of the small cap used previously.

SHEAFFER desk sets are supplied with one of three pens, the Lifetime, No. 71D, Code ZYUBH, the No. 5D, Code ZYUBS, No. 3D, Code ZYUBW. All desk set bases are complete with pens, each of the proper color to match the base, but if it is necessary to order desk pens separately for replacement purposes, the price of the No. 71D is \$8.00, the No. 5D, \$5.00 and the 3D, \$3.00.

SHEAFFER'S PRIZE WINNING DESK SET LINE

Thousands of dollars have been spent in the designing of this striking new line of desk sets. Some of the foremost designers in the country have worked on these sets. Others are the result of prize competitions conducted in leading art schools. Their retail effectiveness has been tested and they sell better than styles offered in years past.

This new line embodies another revolutionary improvement—SHEAFFER'S Dry-proof socket. A little key in the section of the pen engages a clever mechanism within the socket. A half turn to the right locks the pen securely in the socket providing a perfect air-seal and keeping the tip of the pen moist for instant writing. Even when the pen is not locked in the socket, it still seals better than the average desk set since the pen rests against a beveled shoulder within the socket. Thus the pen may be used in the free fitting position throughout the day, locked at night and stored away in a desk drawer with assurance that the pen will not pop out of the socket and be dry the following morning. Or it can be locked in a second at each time of using with virtually no inconvenience.

Only SHEAFFER has the Dry-proof socket. This revolutionary improvement eliminates entirely the major fault with desk sets of the past, drying out of the pen. This improvement makes possible the rehabilitation of the desk set market because it gives you the opportunity of selling quality merchandise at a good profit that will render 100% satisfaction to the customer. SHEAFFER, always the leader, again steps on ahead, with the Dry-proof invention.

Skrip
THE SUCCESSOR TO INK

IN THE NEW SKRIP-WELL BOTTLE

For all fountain pen and general use, recommend SKRIP. It takes six gallons of fluid to make one gallon of SKRIP at much greater cost than ordinary writing fluid. By distillation, all chance of molding and sediment is eliminated and permanency is increased, altogether making it the finest and most satisfactory writing fluid produced. SKRIP keeps both steel pens and fountain pens in better condition. It is made in permanent colors: Blue-Black, Royal Blue, Jet Black and Red, for all business records; and in Washable for schools and homes: Black, Blue, Green, Purple and Brown. Both types are plainly labeled.

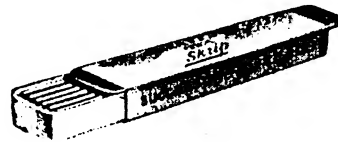

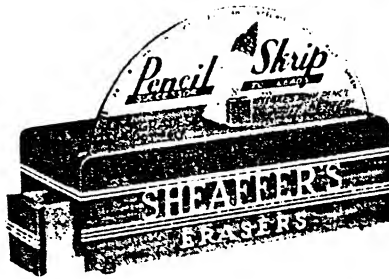

Permanent Red SKRIP is the *only* permanent, sediment-free Red writing fluid produced. Point out to your customers that records of which one-half are permanent and the other half not, are not satisfactory. SKRIP will make them 100% permanent. SKRIP flows freely, dries quickly, spreads evenly and does not clog.

Available now in the greatest writing fluid bottle improvement of all times—the SKRIP-WELL bottle. The SKRIP-WELL uses the last drop, makes fountain pen filling easier, eliminates the inkwell for steel pen dipping and keeps fingers clean.

PENCIL-SKRIP "Successor to Leads"

Millions of SHEAFFER pencils are in daily use. Their owners want SHEAFFER'S Pencil-SKRIP. Stock and display it prominently. PENCIL-SKRIP, of Sheaffer quality, offers you a gigantic market and paves the way for increased pencil business. It is smoother, stronger, writes blacker and more evenly than ordinary leads. It is wax impregnated—not merely coated—and therefore much stronger.

PENCIL-SKRIP is smooth. The highest grade graphite is evenly distributed throughout. It is extremely dense in color.

PENCIL-SKRIP is a round lead, for tests prove that round leads are stronger than square leads. A round lead has equal strength all the way around, no matter which part touches the paper. A square lead is weaker from one side to the other. PENCIL-SKRIP fits all pencils, including those sold with square leads. Special HB Pencil-SKRIP is the best lead produced.

Support PENCIL-SKRIP prominently and consistently. Featured in color advertising blanketing the country. Handy counter case illustrated has supply of erasers, another much needed accessory.
